

**Software Releasing  
Authority (SRA)**

**APPROVAL FOR EXTERNAL SOFTWARE RELEASE**

LMS-CP-1723

Revision: D-3

**Objectives:**

- to ensure appropriate review of all software release approvals
- to ensure that LaRC software release approvals conform to
- NPD 2820.1 and NPR 2210.1, as well as applicable regulations and laws
- to ensure software releases meet programmatic requirements

Approval \_\_\_\_\_ Original signed on file  
Deputy Center Director

**General Information**

The following records are generated by this procedure and should be maintained in accordance with CID 1440.7:

Request for Software Release Classification  
Request Determination of Releasability Review  
Releasability Review Outcome  
Request for Information Technology Security Manager Review  
IT Security Manager Review  
SRA Outcome Notification

**General Note**

This process can only be used by a trained Software Releasing Authority or the Center Releasing Authority. Any other person seeking approval to release software must follow LMS-CP-1724.

**Note 1**

A Request for Software Release Classification must contain the following information:

- A statement of programmatic impact from the Organizational Unit Manager
- An LAR # assigned to a Disclosure of Invention to the Patent Counsel Office
- Desired release classification

**Note 2**

A software release file must be established for each piece of software assessed for releasability and maintained by the Patent Counsel Office

A Patent Attorney must consider the following to determine the releasability of software:

- Ownership of the software
- Restrictions applied on distribution of the software
- Contracts, the Federal Acquisition Regulation (FAR) and NASA FAR Supplement
- NPR 5800.1 and 14 CFR part 1260 for Grants and Cooperative Agreements
- NPR 1050.1 for Space Act Agreements
- Code of Federal Regulations
- United States Code
- Commercialization strategy
- NASA policy NPD 2820.1 and NPR 2210.1

**Note 3**

When the following attributes are present in the software, it must be approved for release by the Information Technology Security Manager; all other software is pre-approved:

- Software that utilizes encryption
- Software that discloses information about the configuration of NASA networks, such as parallel algorithms running explicitly across multiple NASA systems at multiple NASA sites
- Software that performs analysis of network traffic
